SPOT IS HAVING A HALLOWEEN PARTY!!

Thursday October 30th

All day at SPOT for SPOT DOG DAYCARE

Drop off your dog for daycare decked out in their Halloween gear to join the party. Prizes for best costume and most original costume. Michelle Sevigny of DOGTIME www.dogtime.ca will be on hand for **TREAT FOR A TRICK** to teach your dog a new trick. Choose from; roll over, high 5, shake a paw, or spin.

PET FAIR

Friday, October 5th

Douglas College's David Lam Campus
Coquitlam, 2pm-4pm

In promotion of the college's new Animal Health Technology (AHT) program and Animal Health Week. Tour the new AHT teaching labs, get answers to your pet-care questions from faculty vets, pet first aid demonstrations and meet dogs and handlers from Pacific Assistant Dogs Society (PADS).

DOGSAFE Canine First Aid Course

Saturday October 6th

At **A Spot For Spot Dog Daycare**
259 East 1st Street, N.V.

What you do between when an injury happens and when veterinary care is available will greatly affect your dog's chances of a full recovery. Sign up for a DOGSAFE Canine First Aid course and learn the necessary knowledge and skills that will empower you to take positive action in the event of an emergency.

Space is limited so register early at www.dogsafe.ca

NEW STUFF at SPOTS SHOP

Eco Friendly Dog Beds from West Paw Design

Stylish, durable, machine washable and earth friendly. Made from organic grown cotton and stuffed with 85% recycled plastic bottles. A medium Eco Mat diverts 21 bottles from landfills and an Extra Large diverts over 40! Give your dog a comfortable place to rest and do your part to protect the planet. Available in willow/chocolate, sage/chocolate or burnt orange/chocolate.

Who knew soda bottles could be so soft?

www.westpawdesign.com

Another way to help the planet is to deal with poop the earth friendly way using biodegradable pet waste bags from **Petrenz**. Regular plastic bags end up in landfills where they remain for decades without breaking down. This puts stress on the environment. Petrenz biodegradable bags begin the process of degrading in as little as two months when exposed to environmental stressors such as UV rays and other natural elements.
